Office Action Summary					

U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/883,745 Page 2

Art Unit: 1634

DETAILED ACTION

Location of Application

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1634.

Election/Restriction

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-9, drawn to a method for selecting a clone of an ES cell, classified in class 435, subclass 287.2.
 - II. Claims 10-18, drawn to a method for comparing gene expression between test cells, classified in class 435, subclass 287.2.
 - III. Claims 19-25, drawn to a system for testing expression of a gene in a test cell, classified in class 435, subclasses 7.21 and 287.2.
 - IV. Claims 26-30, drawn to an exon trap vector, classified in class 435, subclass320.1.
- 3. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are distinct and independent inventions in that they are directed to methods which comprise different method steps. As a result, different and distinct searches will have to be performed. For example, the search required for Group II such as step (g) in claim 10 is not required for Group I.

Application/Control Number: 09/883,745

Page 3

Art Unit: 1634

Groups I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, that the product as claimed can be made by another and materially different apparatus such as the method in Group II.

Groups I and IV are distinct and independent inventions in that they are directed to a method and an unrelated product. As a result, different and distinct searches will have to be performed. For example, the search required for Group IV such as a vector in claim 26 is not required for Group I.

Groups II and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, that the product as claimed can be made by another and materially different apparatus such as the method in Group I.

Groups II and IV are distinct and independent inventions in that they are directed to a method and an unrelated product. As a result, different and distinct searches will have to be performed. For example, the search required for Group IV such as a vector in claim 26 is not required for Group II.

Application/Control Number: 09/883,745 Page 4

Art Unit: 1634

Groups III and IV are distinct and independent inventions in that they are directed to a method and an unrelated product. As a result, different and distinct searches will have to be performed. For example, the search required for Group IV such as a vector in claim 26 is not required for Group III.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. This application contains claims directed to the following patentably distinct species of the claimed invention:
- (1) a selectable marker (claim 27)
- (2) supF (claim 28)
- (3) a recombination site (claims 29 and 30)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are 1-26.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Application/Control Number: 09/883,745

Page 5

Art Unit: 1634

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Papers related to this application may be submitted to Group 1600 by facsimile 6. transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CAR § 1.6(d)). The CM Fax Center number is either (703) 308-4242 or (703)305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank Lu, Ph.D., whose telephone number is (703) 305-1270. The examiner can normally be reached on Monday-Friday from 9 A.M. to 5 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, W. Gary Jones, can be reached on (703) 308-1152.

Application/Control Number: 09/883,745 Page 6

Art Unit: 1634

Any inquiry of a general nature or relating to the status of this application should be directed to the patent Analyst of the Art Unit, Ms. Chantae Dessau, whose telephone number is (703) 605-1237.
